Evanescia

Skill deals multi-hit damage. On execute (kill) it restores stacks and energy.
When teammates trigger Follow-up / Extra turn/ Aha Instant, Evanescia gains stacks.
The Ultimate can either consume stacks to deal damage or clear the stacks for damage; executing an enemy gives extra action and energy refund.
Her Aha Instant appears in the middle of the action order and can be copied.

Sw SP

The Ultimate transformation mainly charges through **punchlines** converted from Aha Instants.
For characters on the Elation path, the order of Aha Instants is fixed, and Sw SP's always goes last.
Sw SP's Aha Instant cannot be copied.

In the transformation state, the dragon cannot be controlled.
When using single-target attacks, Sw SP attacks first and the dragon follows up.
When using AoE gestures/attacks, the dragon also follows up afterward.
At the end, snapping fingers triggers one special Aha Instant.
In transformation, the punchlines generated by Aha Instants can store energy, but there is a limit.

One more thing worth mentioning is that a future character who can copy Ultimates when conditions are met will be a teammate of Sw SP and Evanescia.
